

I oppose loosening the rules designed to promote and protect diversity of media ownership. These rules were adopted to ensure that the public would receive a diverse range of viewpoints from the media, and not simply the opinions of a handful of media conglomerates.

Especially we need:

1. Open access regulations so ISPs can offer services on all platforms.
2. Privacy regulations extended to include all interactive media.
3. Preservation of the open system of the internet.
4. Set-top boxes should be nonproprietary and user configurable.
5. Broadband technology should have rules that expand programming to include enhanced campaign coverage, community forums and cultural programming as well as lifelong learning and other educational opportunities.
